

Gaourav Patil

AIOps Engineer | DevOps | Kubernetes | AWS

Where CI/CD Meets AI: An AI Cloud Engineer Stepping into Intelligent Automation

+91 9834892067 | patilgaourav304@gmail.com | Portfolio | GitHub | LinkedIn | Pune, India

Professional Summary

RHCSA-RedHat Certified System Administrator with extensive experience in AWS Cloud, DevOps, and Linux systems. Proficient in full-stack development with AI tools, driven by a passion for creating smart, automation-focused solutions. Aiming to leverage technical expertise to develop AI-powered internal tools, such as intelligent support chatbots, that enhance IT operations.

Skills

Programming	Python, Go, Java, C++
Frameworks	Express, React, Flask, FastAPI
Databases	PostgreSQL, MongoDB, Supabase
Tools	Git, GitHub, Docker, Kubernetes, Jenkins, Linux, Postman, CI/CD
AI	Cursor, Claude AI, Vercel v0, ChatGPT
Languages	English, Hindi, Marathi
Soft Skills	Leadership, Problem Solving, Critical Thinking

Projects

Lexus – Cross Model Persistent Memory GitHub
Individual

- Developed an **LLM orchestration platform** providing Memory as a Service (MaaS) that enables multiple AI models to share persistent contextual memory across sessions.
- Engineered a cross-model memory layer allowing models such as GroqAI, MistralAI, ChatGPT, and Gemini to exchange summarized context, reducing redundant token consumption.
- Achieved a **45% reduction in token usage** through intelligent context summarization, memory retrieval, and optimized prompt management, forming the foundation of a scalable SaaS architecture.
- Built the backend using Go, Supabase, and PostgreSQL, integrating multiple LLM providers with a modular orchestration layer for efficient AI workflow management.

Technologies: Go, React, Gemini, Groq AI, Mistral AI, Claude, AWS, Docker, Terraform, Supabase

AnnaData – Agro AI GitHub
Lead Developer

- Built a full-stack agricultural platform using GroqAI integrated with Weather API and Location API.
- Designed and implemented **RESTful APIs** with asynchronous middleware for efficient backend communication.
- Delivered real-time agronomic intelligence, crop recommendations, and subsidy pathways for farmers.
- Developed a low-latency user interface to provide fast and accessible services for rural users.

Technologies: Python, React, Docker, PostgreSQL, JWT

AI DevOps Orchestrator GitHub
Individual

- Developed an AI-enabled **DevOps orchestration** platform for Kubernetes resource management through REST APIs and a centralized execution engine.
- Implemented JWT authentication, dependency injection, structured logging, and standardized API responses using enterprise software design principles.
- Built a scalable microservices architecture supporting AI-assisted deployments, GitOps workflows, and cloud-native automation.

Technologies: Node.js, Express.js, React.js, Python, PostgreSQL, REST APIs, GroqAI

Education

MIT World Peace University, Pune Jul 2025 – Jul 2027
Master's of Computer Application (MCA)
CGPA: 7.29

- Coursework: Data Structures & Algorithms, Java Web & Network Programming, Probability & Statistics, Cloud Computing.
- Developed and deployed Lexus – Cross Model Persistent Memory as a practical engineering project.

Rajarshi Shahu Mahavidyalaya, Latur Jul 2022 – Jul 2025
Bachelor's of Computer Application (BCA)
CGPA: 6.67

- Coursework: C, C++ & Algorithms, Java Web & Network Programming, Probability & Statistics, Cloud Computing.
- Visited Open Source Conferences, learnt about tech culture.
