

GAOURAV PATIL

Where CI/CD Meets AI: An AI Cloud Engineer Stepping into Intelligent Automation

📞 9834892067 ✉ patilgaourav304@gmail.com 🌐 linkedin 🐙 GitHub 📍 pune, India

PROFESSIONAL SUMMARY

RHCSA-Redhat certified System Administrator with extensive experience in **AWS Cloud, DevOps, and Linux systems**. Proficient in full-stack development and AI tools, driven by a passion for creating smart, automation-focused solutions. Aiming to leverage my technical expertise to develop AI-powered internal tools, such as intelligent support chatbots, that enhance IT.

WORK EXPERIENCE

AWS Cloud Intern | Internship

Jun 2025 - Aug 2025

F13 Technologies Pvt Ltd

Remote • Delhi

- Deployed and managed cloud infrastructure on **AWS EC2**, configuring **VPC networking** to ensure secure, scalable environments for AI/ML application workloads.
- Automated routine cloud operations using **AWS Lambda** (serverless functions) and scripting, decreasing manual intervention and accelerating iteration cycles for AI model deployment pipelines.
- Managed data storage solutions with **Amazon S3** and **RDS/DynamoDB**, structuring data pipelines for efficient ingestion and retrieval of AI-ready datasets.

Technologies / Skills Used : EC2, VPC, Subnets, Security Groups S3, EBS, EFS (Storage) RDS, DynamoDB (Database) Lambda, Shield (Security)

PROJECTS

AnnaData | 🐙 Github

Present

Lead Developer

- Engineered a robust **full-stack platform** using GrokAI for **Weather API** and **Location API**.
- Executed **RESTful API** orchestration with asynchronous middleware pipelines.
- Delivered real-time **agronomic intelligence**, commodity telemetry, and subsidy procurement pathways for rural stakeholders.
- Transformed complex data layers into an accessible, low-latency interface for farmers.

Technologies / Tools Used : Node.js, Express, Python, PostgreSQL, APIs, GrokAI, React.js

Fitness MicroService

Dec 2025 - Present

Individual

- Developed a **distributed fitness application** using **microservices architecture**, enabling independent operation of core domains such as authentication, workout management, diet planning, activity tracking, and notifications. Ensured **scalability** and fault isolation through service interactions via **REST APIs** and messaging queues, facilitating continuous deployment.

Technologies / Tools Used : java, Eureka, Nginx, OpenAI, AWS SNS, springboot, PostgreSQL

EDUCATION

PostGraduation | Pune

Jul 2025 - Present

Master of Computer Application (MCA)

CGPA : 7.32

- Completed coursework in **Data Structures & Algorithms, Java Web & Network Programming, Probability & Statistics**, and **Cloud Computing**
- Developed and deployed **Annadata**, a full-stack agrarian intelligence platform as a practical engineering project

SKILLS

Databases : PostgreSQL, Redis, MongoDB

Frameworks & Libraries : Express, React, Flask

Languages : English, Hindi, Marathi

Programming Languages : C++, Java, Go, Python

Soft Skills : Leadership, Problem Solving, Critical Thinking

Tools & Platforms : Git, GitHub, Docker, Kubernetes, Postman, Jenkins, Linux, CI/CD
